

## Appendix H

### City of Galveston Critical Facility Inventory

#### Contents of this Section

- H.1 City of Galveston Critical Facility Inventory
- H.2 City of Galveston Critical Facility Damage Information, Hurricane Ike

**NOTE: For security reasons, Table H.1-1 of this Appendix is redacted from public copies of this Plan.**

#### H.1 City of Galveston Critical Facility Inventory

Table H.1-1 provides information regarding critical facilities in the City of Galveston, as identified by the Hazard Mitigation Plan Stakeholder Committee.

Estimated service values for utilities were determined using 2010 population estimates and base figures for service outage costs provided in the FEMA publication “What is a Benefit?”.

For water and wastewater facilities, replacement costs were estimated using an industry-standard per gallon capacity cost estimate. This estimate includes both structure and infrastructure; therefore, only one figure has been provided for both.

All other valuations were determined using methodologies provided in *FEMA 386*, with figures updated to reflect 2010 inflation.

## H.2 City of Galveston Facility Damages, Hurricane Ike

Table H.2-1 provides information regarding facilities, services and equipment in the City of Galveston that sustained damage from Hurricane Ike. This information is taken from FEMA's Project Worksheets, and is intended to represent the actual risk to each of the identified facilities or equipment from a 1% flood event.

**Table H.2-1**  
**Galveston Facility Damages – Hurricane Ike**
